**Service-oriented caretaker**

A broken door handle, a chain that popped out or a glass pane had a close encounter with a soccer ball - I got it.

I am a handy girl of 22 years who are interested in the job caretaker on residential property company Rent Home.

In high school I build the program and then did military service as machine technician. Where I learned how to solve technical

information of all kinds. I also have experience of service. I work as a waitress, I received

knowledge that even a janitor need. I learned to such as managing customer contacts and spread a little extra joy.

My social skills have been further strengthened my long trips to India and Sri Lanka. To meet people and practical challenges is the best I know.

Please talk to any of my references
